INTRODUCTION

Aside from the exceptions noted in the introduction to the Latin volume, the first entry for each species is always that given in the Third Edition of *The Howard and Moore Complete Checklist of Birds* (Princeton and Oxford, 2003), edited by Edward C. Dickinson, including corrigenda through 2007.

Names cited by the listed primary English-language authorities are given only when they differ significantly from *Howard and Moore*, space permitting, in the following order of preference:

- Sibley, Charles G.; and Monroe, Burt L., Jr.: *Distribution and Taxonomy of Birds of the World* (New Haven and London, 1990) with the 1993 *Supplement*
- Clements, James F.: *The Clements Checklist of Birds of the World*, Sixth Edition (Ithaca and London, 2007)
- del Hoyo, Josep, et. al.: *Handbook of Birds of the World*, Volumes 1 through 12 (Barcelona, 1992-2007)
- American and British Ornithologists' Unions

followed by miscellaneous secondary sources. Entries in Franklin Gothic Demi font indicate disagreement or duplication among the primary sources. Disagreements or duplications among secondary sources are omitted, and there is, for reasons of space, no notice taken of minor deviations in hyphenation or British and American spelling.

(There is another, somewhat controversial English-language source known as Gill & Wright that appeared in print too late for consideration here.)
